

Google Chrome Hardware Acceleration Related Settings and Flags

Used to resolve green screen when watching videos and slowness in ST math and Imagine Learning

Turn **ON** hardware acceleration in Google Chrome settings

- 1 – Open Chrome and type in `chrome://settings/system` and press enter
- 2 – Slide switch to right beside “Use hardware acceleration when available.”

Disable two hardware flags in Chrome

1 – Open Chrome and type in chrome://flags and press enter.

2 – In the search bar, type hardware.

3 - The top two results should be **Hardware-accelerated video encode** and **Hardware-accelerated video decode**.

4 – **Disable both** items.
